

CS to Implementation Flow Chart

End-to-end MIS production process

Important notes

Skip Design, Finishing, or Delivery only when the job does not require that department.
Estimate PDFs are created separately for each billing location, such as North, South, East, and West.

Detailed Department Flow

Inputs, actions, and outputs for each MIS stage

Stage	Screen	Main User Action	Output
Job Entry	Production > Job Entry	Add line items, charges, dimensions, store, billing location, and deadlines.	Saved job rows and estimate PDF or mail when needed.
CS	Production > CS	Review jobs, SLA, pending/hold rows, delivery status, implementation status, and uploads.	Clear tracking and department handoff.
Design	Production > Design	Assign designer, update brief, query, and deadline, then complete artwork.	Approved or completed design or artwork.
Printing	Production > Printing	Select rows, enter printer and media details, start and stop print job.	Printing completed status.
Finishing	Production > Lamination / Mounting & Packing	Start and stop lamination, mounting, and packing activity.	Packed and finished material ready for dispatch.
Delivery	Production > Delivery	Enter delivery person, mode, timestamps, and create challan.	Delivery challan and delivery done status.
Implementation	Production > Implementation	Create implementation challan and upload execution proof media.	Implementation done and uploaded status.
Billing	Invoice / Reports	Prepare invoice, check challans, export billing and MIS reports.	Final billing and reporting output.
