

CS to Implementation User Manual

MIS production process

Scope

This manual explains the complete operating flow from Job Entry and CS monitoring to design, printing, finishing, delivery, implementation, proof upload, invoices, and reports.

Main menu path: Production > Job Entry > CS > Design > Printing > Lamination / Mounting & Packing > Delivery > Implementation.

Roles

Role	Main Work
CS / Customer Service	Monitor job line items, status, SLA, pending jobs, customer approval, and handoff.
Job Entry User	Create job rows, charges, estimate PDFs, and estimate mails.
Designer	Complete artwork, update design status, and upload approval or artwork details.
Printing Operator	Start and stop printing with printer and media details.
Lamination / Mounting / Packing Operator	Complete finishing and packing activity.
Delivery Coordinator	Add delivery details and create delivery challan.
Implementation Executive	Complete implementation, create challan, and upload proof media.
Billing / Admin	Prepare invoices, check challans, download reports, and export billing data.

Screen Reference

Screen	Menu Path	Purpose
Job Entry	Production > Job Entry	Create job line items and estimate PDFs.
CS	Production > CS	Track all job rows, SLA, delivery, implementation, and upload status.
Design	Production > Design	Assign and complete artwork or design work.
Printing	Production > Printing	Start and stop printing work.
Lamination / Mounting & Packing	Production > Lamination / Mounting & Packing	Complete finishing and packing.
Delivery	Production > Delivery	Add delivery details and create delivery challan.
Implementation	Production > Implementation	Create implementation challan and upload proof media.
Implementation Download	Production > Implementation Download	Download or view implementation upload details.
Invoice / All Invoices	Production > Invoice / All Invoices	Prepare invoice preview and view invoice list.
Reports	Production > Reports	MIS, weekly audit, consolidated MIS, and billing export.

1. Login

1. Open the MIS application.
2. Enter username and password.
3. Click login.
4. Open the Production menu from the sidebar.

2. Master Data Check

Before creating or processing jobs, confirm that all required master data is available.

- Store Master: confirm client, store, and address details.
- Product Media Rates: confirm media and rate details.
- Element Group Master: confirm element grouping if the job requires it.

3. Job Entry

1. Open Production > Job Entry.
2. Select or create the job.
3. Add each line item with region/production location, billing location, salon/store, address, brand, product, element, media, visual code, quantity, dimensions, deadline, and remarks.
4. Add installation charges, transportation charges, and layouting charges where applicable.
5. Save the job rows.
6. Use Excel copy/paste when many rows need to be added quickly.

4. Estimate PDF and Mail

1. Select the required job rows in Job Entry.
2. Click Send Mail.
3. Confirm To, Subject, and Body.
4. Review the attachment list.
5. Click Send Mail.

The system creates separate estimate PDF files by billing location. For example, if selected line items have billing locations North, South, East, and West, separate estimate PDFs are created for each location. The PDF includes installation, transportation, and layouting charges when added in the line items.

5. CS Monitoring

1. Open Production > CS.
2. Use search, filters, and tabs to find the required job.
3. Check line-item status, SLA alerts, pending rows, and hold rows.

4. Confirm delivery status, implementation status, and implementation upload status.
 5. Export data when required for coordination or reporting.
- Verify job number, client, store, and address.
 - Verify production location and billing location.
 - Verify quantity, dimensions, deadline, and charges.
 - Confirm customer approval or PO status before further work.

6. Design

1. Open Production > Design.
2. Search or filter the required job.
3. Select the job row.
4. Update designer name, design type, brief, query, and deadlines.
5. Start the design job.
6. Complete the design job after artwork is ready.
7. Upload approval/artwork images if required.
8. Refresh the list and confirm the status is updated.

7. Printing

1. Open Production > Printing.
2. Search or filter the required job rows.
3. Select the rows to print.
4. Select the printing machine/printer.
5. Enter media width and media length where required.
6. Click Start Job.
7. After printing is completed, click Stop Job.
8. Confirm the completed printing status.

8. Lamination, Mounting, and Packing

1. Open Production > Lamination / Mounting & Packing.
2. Search or filter by job, location, or store.
3. Select the required rows.
4. Click Start Job.
5. Complete lamination, mounting, and packing activity.
6. Click Stop Job.
7. View challan details if available.

9. Delivery

1. Open Production > Delivery.
2. Select the required job rows.
3. Enter delivery person.
4. Enter delivery start time.
5. Enter delivery completed time.
6. Select delivery mode.
7. Click Add to save delivery details.
8. Click Create Challan.
9. Review challan details and save.

10. Implementation

1. Open Production > Implementation.
2. Search or filter the required job rows.
3. Select the implemented rows.
4. Enter implementation timestamp/details.
5. Click Create Implementation Challan.
6. Upload implementation media.
7. Select media type/image type as required.
8. Enter implementation person, contact, and authority details if required.
9. Submit the upload and confirm upload status.

11. Invoice and Reports

- Use Invoice to prepare invoice preview.
- Use All Invoices to view existing invoices.
- Use Challan Dashboard to check delivery and implementation challans.
- Use MIS Report, Weekly Audit Report, and Consolidated MIS Report for tracking.
- Use Billing Export for billing data export.

Common Controls

Control	Use
Search	Find job number, client, store, city, or other visible row details.
Filters and Tabs	Narrow down jobs by status, location, or workflow area.
Checkbox	Select one or more rows for action.

Control	Use
Refresh	Reload latest data from the server.
Export or Download	Download Excel, CSV, or PDF data where supported.
Start Job	Begin department work and capture start status/time.
Stop Job	Complete department work and capture end status/time.
Create Challan	Generate delivery or implementation challan for selected rows.
Upload Media	Upload implementation or approval proof.

Handoff Checklist

- Job number and client are correct.
- Store/salon name and address are correct.
- Billing location and production location are correct.
- Product, media, element, and visual code are correct.
- Quantity, dimensions, and square feet are correct.
- Installation, transportation, and layouting charges are added when applicable.
- Deadline is entered.
- Customer approval/PO confirmation is available where required.
- Challan is created for delivery/implementation where required.
- Implementation proof media is uploaded after execution.

Troubleshooting

Issue	Check
Job rows are not visible in CS	Refresh the screen, check filters/tabs, and confirm rows were saved in Job Entry.
Estimate PDF is not split correctly	Confirm each line item has the correct billing location.
Charges are missing from PDF	Confirm installation, transportation, and layouting charges are entered before sending mail.
Cannot start printing	Select rows and enter required printer/media details.
Packing job is not visible	Confirm printing is completed and filters/location are correct.
Delivery challan is not created	Select rows and save delivery details before creating challan.
Implementation upload is missing	Confirm implementation challan is created and media upload was submitted successfully.
Status is not updated	Refresh the screen and verify the previous department has stopped/completed the job.
